BADMINTON EQUIPMENT 2010

apacs sports uk

Feel Better,
Be Better

NANO TECHNOLOGY

Nano technology is the ability to control racket manufacture at molecular level! By bridging the bonds between carbon atoms and filling the voids Apacs Technology Partners help to ensure all of our rackets are manufactured to last. Apacs insist on the best materials, that why we only use Japanese manufactured raw materials from Toray or Mitsubishi

ISOMETRIC HEAD SHAPE

The isometric head shape equalises the length of the main and cross strings giving a larger sweet spot.

IMPROVED T-JOINT

Apacs specially patented improved t joint designs affords excellent racket head stability.

HIGH SPEED FRAME

The new high speed frame design ensures maximum efficiency of swing generating excellent speed.

INTERNAL MUSCLE TECH

The internal muscle technology design affords greater strength to the racket ensuring racket head stability

CARBON NANO TUBE

The use of Carbon nano tube technology ensures that the racket head and shaft return to there original shape as soon as possible improving racket elasticity and elongating the contact time with the shuttle giving excellent shot control without compromising power.

VACUUM INTENSIVE FRAME

This process, Vacuum Lamination, usually used for high performance fiberglass boat or aerospace manufacture, it ensures the highest quality of multilayer fiber materials whilst reducing air, moisture and volatile compound entrapment in the racket leading to improved overall wall thickness uniformity. This helps reduce stress and eliminates warp on the finished product due to better layer-to-layer registration.

LETHAL RACKET RANGE

LETHAL 90

Frame Material 30T HM Graphite (Mitsubishi M30) + Titanium Mesh
Shaft Material 40T HM Graphite (Toray M40)
Flex Stiff
Weight 3U (86-89g) G2
Length 675mm
Balance 290 ± 3mm (Head Heavy)
Max String Tension 35lbs!

LETHAL 70

Frame Material 30T HM Graphite (Mitsubishi M30) + Titanium Mesh
Shaft Material 40T HM Graphite (Toray M40)
Flex Stiff
Weight 3U (86-89g) G2
Length 675mm
Balance 290 ± 3mm (Head Heavy)
Max String Tension 35lbs!

LETHAL 11

Frame Material 30T HM Graphite (Toray M30) + CNT
Shaft Material 24T HM Graphite (Toray T700) + CNT
Flex Extra Stiff
Weight 4U (84-86g) G2
Length 673mm
Balance 285 ± 3mm (Even Balance)
Max String Tension 35lbs!

LETHAL 7

Frame Material 30T HM Graphite (Toray M30) + CNT
Shaft Material 24T HM Graphite (Toray T700) + CNT
Flex Extra Stiff
Weight 4U (84-86g) G2
Length 673mm
Balance 285 ± 3mm (Even Balance)
Max String Tension 35lbs!

TANTRUM 300

The Tantrum 300 uses a process called Vacuum Lamination, usually used for high performance fiberglass boat or aerospace manufacture, it ensures the highest quality of multilayer fiber materials whilst reducing air, moisture and volatile compound entrapment in the racket leading to improved overall wall thickness uniformity. This helps reduce stress and eliminates warp on the finished product due to better layer-to-layer registration.

ARMOUR MUSCLE PRO 101

EDGESABER Z SLASH

EDGESABER Z SLAYER

Frame Material 30T HM Graphite (Mitsubishi M30) + Nano VIM
 Shaft Material 40T HM Graphite (Toray M40) + Nano VIM
 Flex Stiff
 Weight 3U (86-89g) G2
 Length 675mm
 Balance 285 ± 3mm (Even Balance)
 Max String Tension 35lbs!

Frame Material HM Graphite + Ultra PEF
 Shaft Material HM Graphite + Ultra PEF
 Flex Stiff
 Weight 3U (86-89g) G2
 Length 675mm
 Balance 285 ± 3mm (Head Heavy)
 Max String Tension 35lbs!

Frame Material 30T HM Graphite (Toray M30) + CNT
 Shaft Material 40T HM Graphite (Toray M40) + CNT
 Flex Medium
 Weight 4U (86-89g) G2
 Length 670mm
 Balance 285 ± 3mm (Head Heavy)
 Max String Tension 35lbs!

Frame Material 30T HM Graphite (Toray M30) + CNT
 Shaft Material 40T HM Graphite (Toray M40) + CNT
 Flex Medium
 Weight 4U (86-89g) G2
 Length 670mm
 Balance 285 ± 3mm (Head Heavy)
 Max String Tension 35lbs!
